"HARNESSING THE WISDOM OF PRACTICE: METHOD, THEORY AND RESEARCH"

A workshop led by Professor Elaine Graham exploring the dynamic interplay between practice and theology.

Over the past generation, PT has undergone a sea-change in its self-understanding, putting emphasis on the nature of 'practice' as situated at the very heart of the discipline's focus, method and subject-matter. In this lecture, Prof Elaine will introduce some of the issues at stake and trace how 'practice' as research is gaining currency and acceptance across a range of disciplines but also how this is contributing to a re-conceptualisation of the discipline. Not only is theology practical, but practice is theological.
